Gen-Lev Van

Introducing The New Gen-Lev™ Van

The Gen-Lev Van takes the technology advancements from the Gen-Lev Transporter to new heights. The Gen-Lev Van will be showcased at the Detroit auto show in June 2023. Currently in prototype in testing, the van has room for 6 adults along with 22 cubic feet of cargo space. It can reach a maximum speed of 76 miles an hour with a useful range of 375 miles or 604 kilometers. It's powered by 4 hydrogen fuel cells similar to the Gen-Lev Transporter.

It's available in a choice of six colors and 3 interior designs ranging from cloth seats to reclining leather captains chairs.

It's enhanced onboard supercomputer features GPS navigation and driverless control. Since it has no wheels and no moving parts it will require zero service. The dilithium crystals are warrantied for 10 years or 100,000 miles.

The MSRP has not yet been announced.
